Chakrai Agent Cheat Sheet

The Big Picture,

Chakrai is building an AI-native therapeutic ecosystem that combines a 190-point clinical personality

engine, biometric predictive modeling, and HIPAA-grade security to deliver proactive, personalized

mental health support at scale.

Market Opportunity

• Global digital mental health market: $17.5B by 2030 (20% CAGR).

• Serviceable US market: ~$3B (therapy apps, wellness platforms).

• Chakrai target: $100M ARR within 3 years (B2C + B2B2C).
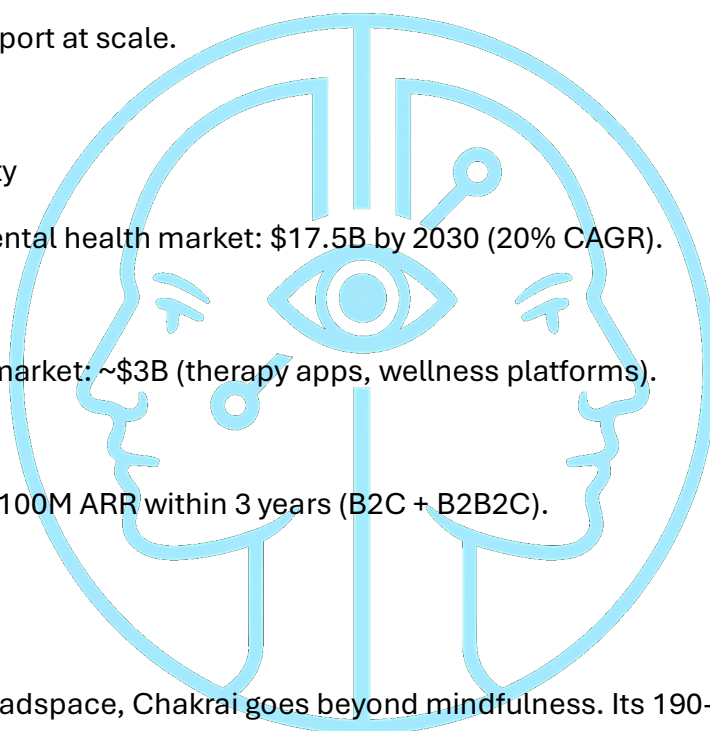

Key Differentiator

Unlike Calm or Headspace, Chakrai goes beyond mindfulness. Its 190-point personality engine +

biometric fusion enables real-time crisis prediction and personalized interventions — making it clinically

credible, not just wellness-focused.

Progress & Milestones

• Built Chakrai 2.0 architecture and HIPAA-grade infrastructure.

• Journaling, analytics, and therapist portal in development.

• IRB-approved therapist pilot studies planned.

• Roadmap: 10k users + ~$12k MRR within 12 months.

The Deal

Raising $250k–$500k seed on a $5–8M post-money valuation.

Options: 5–10% equity or SAFE (20% discount, $6–8M cap).

- Runway: 12 months to prove ARR traction + clinical validation.

Team:

Daniel Sharpe — CEO & Founder: A seasoned product and engineering leader. Daniel holds an M.S. in Computer Science.

-

Advisory Board: Chakrai will be assembling an advisory board of leading clinical psychologists, digital health experts, and regulatory specialists. The advisory board will guide clinical validation, regulatory strategy, and product-market fit. Additional advisors are in discussions, with a focus on expanding clinical and operational expertise. Chakrai's lean, AI-augmented operating model allows for rapid, cost-effective scaling—combining deep domain expertise with advanced engineering and clinical partnerships
